📄 SUMMARY

Engineering undergraduate deeply enthusiastic about frontend development and problem-solving. Good knowledge of HTML CSS JavaScript, and React, having developed interactive web applications and done personal projects. Also an active competitive programmer and hackathon participant, with demonstrated skills to learn fast and work independently even under extreme pressure.

🧠 SKILLS

HTML

CSS

Javascript

C

Python

React Js

🌐 LANGUAGE

Nepali

English

🎓 ACADEMY

Advanced College Of Engineering And Management,
COMPUTER ENGINEERING

10/2025 – Present | Kathmandu

Prerana Secondary Boarding School, SCIENCE

08/2023 – 08/2025 | Bharatpur

🏆 ACHIEVEMENTS

Winner At Prerana Competitive Programming, *Prerana, Bharatpur*

First Runner Up At Inter School Hackathon, *SOS, Bharatpur*

📁 PROJECTS

Study Tracker, <https://tracker.paudelmohan.com.np>

Built a basic web application for students to track study records and plan their study schedule. Learned and applied the fundamentals of the MERN stack while developing the project, including frontend development, backend APIs, database integration, and user interaction.

ID Card Generator, <https://getidcard.paudelmohan.com.np>

GetIDCard is a lightweight online tool that lets you generate clean, professional ID cards in minutes. No sign-ups, no unnecessary features—just a fast, practical solution for creating digital ID cards when you need them.

CrickVerse, <https://mohanpaudel761.com.np>

Built a cricket score tracking platform using HTML, CSS, and Vanilla JavaScript. Learned API integration, asynchronous data handling, and rate limit management while developing the project.

Discord Bot

Built a basic Discord bot for a college server to automate simple tasks and moderation features. Developed the project to learn the fundamentals of Discord bot development, command handling, and API integration.
